PELVIS GYNAE : TA & TV PRO

Inverted uterus measures 7 x 4.4 x 5.7cm. It appears heterogeneous however no focal fibroids are identified.

Endometrium is irregular, ill defined and thickened measuring 7mm. There appears to be an echogenic focusing within the uterine cavity. However it is difficult to adequately assess.

Right ovary measures 2.5 x 2.2 x 1.6cm and the left ovary measures 2.7 x 1.6 x 1.5cm. Both ovaries contain single simple cyst measuring 6mm in maximum diameter.

Adnexal masses or cysts are seen. Free fluid is seen within the pelvis.

ologist: ULTRASONOGRAPHER / KF

Report : 19/05/2005
